a.pass (advanced performance and scenography studies) is an artistic and educational research environment that welcomes research practitioners, from all professional backgrounds in an international self-organized, collaborative and trans-disciplinary program. a.pass includes two complementary structures that operate in parallel and in dialogue: the Postgraduate Program and the Research Center.

This call for applications is inviting researchers who would like to start or continue a research trajectory within an experimental and professional artistic research environment. a.pass offers a one-year post-graduate program or a one-year Associate Researcher affiliation where researchers can develop research proposals in a collective, supportive environment independent from production constraints.

a.pass welcomes proposals which are directly situated and working within existing communities. We strive to develop a greater network between existing communities and become a hub for research methodologies that are grounded and productive in existing contemporary struggles.

DEADLINE: 15.01.2022.
